THE JOURNAL OF Supercritical Fluids

Subject Index

Acetic acid
Solubility of stearic acid in supercritical CO_2-acetic acid and CO_2–*n*-octane mixtures at 308.15 K 123

Acid-base equilibria
Neutralization of acids and bases in subcritical and supercritical water: acetic acid and HCl 155

Adsorption isotherms
Breakthrough curves and adsorption isotherms of terpene mixtures in supercritical carbon dioxide 43

Angelica archangelica L.
Supercritical carbon dioxide extraction of *Angelica archangelica* L. root oil 59

Aqueous azeotropic mixtures
Near-critical separation of aqueous azeotropic mixtures: process synthesis and optimization 69

Aromatics
Organic synthesis in subcritical water. Oxidation of alkyl aromatics 255

Breakthrough curves
Breakthrough curves and adsorption isotherms of terpene mixtures in supercritical carbon dioxide 43

Capillary GC–MS
Supercritical carbon dioxide extraction of *Angelica archangelica* L. root oil 59

Carbon dioxide
Supercritical carbon dioxide extraction of *Angelica archangelica* L. root oil 59
High pressure phase equilibrium for binary system dl-α tocopherol + methanol 99

Carbon dioxide
An empirical method to evaluate the enhancement factors of solids in supercritical gases 129
High-pressure multiphase behaviour of ternary systems carbon dioxide–water–polar solvent: review and modeling with the Peng–Robinson equation of state 185

β-Carotene
Extraction of β-carotene with supercritical fluids. Experiments and modelling 261

Critical CO_2
A new apparatus for the determination of *P–x–y* diagrams and Henry's constants in high pressure alcohols with critical carbon dioxide 223

Critical points
High-pressure multiphase behaviour of ternary systems carbon dioxide–water–polar solvent: review and m leling with the Peng–Robinson equation of state 185

Cubic equations of state
Prediction of phase behavior, Henry's constants and infinite dilution partial molar volumes for methane, ethane and hydrogen in *n*-paraffins 11

Density measurement
A new apparatus for the determination of *P–x–y* diagrams and Henry's constants in high pressure alcohols with critical carbon dioxide 223

Derivatisation
Irradiation of low density and high density polyethylenes in presence of carbon dioxide in subcritical and supercritical conditions 177

Essential oil
Supercritical carbon dioxide extraction of *Angelica archangelica* L. root oil 59

Ethanolysis
Process parameters influencing ethanolysis of cod liver oil in supercritical carbon dioxide 85

Ethyl esters
Process parameters influencing ethanolysis of cod liver oil in supercritical carbon dioxide 85

Experimental data
A new apparatus for the determination of *P–x–y* diagrams and Henry's constants in high pressure alcohols with critical carbon dioxide 223

Freeze-dried carrots
Extraction of β-carotene with supercritical fluids. Experiments and modelling 261

Functionalisation
Irradiation of low density and high density polyethylenes in presence of carbon dioxide in subcritical and supercritical conditions 177

Gamma irradiation
Irradiation of low density and high density polyethylenes in presence of carbon dioxide in subcritical and supercritical conditions 177

Henry's constant
Prediction of phase behavior, Henry's constants and infinite dilution partial molar volumes for methane, ethane and hydrogen in *n*-paraffins 11

A new apparatus for the determination of P–x–y diagrams and Henry's constants in high pressure alcohols with critical carbon dioxide 223
High-pressure
Solubility behavior of solids and liquids in compressed gases 1
High-pressure reaction engineering
Phase behavior of the reactants, products and catalysts involved in the allylic epoxidation of trans-2-Hexen-1-ol to (2R,3R)-(+)-3-Propyloxiranemethanol in high pressure carbon dioxide 109
High-pressure ternary phase equilibrium
High-pressure multiphase behaviour of ternary systems carbon dioxide–water–polar solvent: review and modeling with the Peng–Robinson equation of state 185
Hydrolysis
Product distribution and reaction pathways for methylene chloride hydrolysis and oxidation under hydrothermal conditions 239
Hydrothermal chemistry
Neutralization of acids and bases in subcritical and supercritical water: acetic acid and HCl 155
Infinite dilution partial molar volume
Prediction of phase behavior, Henry's constants and infinite dilution partial molar volumes for methane, ethane and hydrogen in n-paraffins 11
Isobutane oxidation
Isobutane oxidation in the liquid and supercritical phases: comparison of features 165
Lipase
Process parameters influencing ethanolysis of cod liver oil in supercritical carbon dioxide 85
Liquid-phase oxidation
Isobutane oxidation in the liquid and supercritical phases: comparison of features 165
Mass transfer model
Extraction of β-carotene with supercritical fluids. Experiments and modelling 261
Mechanisms
Kinetics and mechanism of methane oxidation in supercritical water. Oxidation of alkyl aromatics 141
Methane
Kinetics and mechanism of methane oxidation in supercritical water. Oxidation of alkyl aromatics 141
Methanol
High pressure phase equilibrium for binary system dl-α tocopherol + methanol 99
Methylene chloride
Product distribution and reaction pathways for methylene chloride hydrolysis and oxidation under hydrothermal conditions 239
Modeling
Solubility behavior of solids and liquids in compressed gases 1
Modelling
Kinetics and mechanism of methane oxidation in supercritical water. Oxidation of alkyl aromatics 141
Near-critical gases
Near-critical separation of aqueous azeotropic mixtures: process synthesis and optimization 69
Near critical fluids
High-pressure multiphase behaviour of ternary systems carbon dioxide–water–polar solvent: review and modeling with the Peng–Robinson equation of state 185
n-Octane
Solubility of stearic acid in supercritical CO_2-acetic acid and CO_2–n-octane mixtures at 308.15 K 123
Optimization
Near-critical separation of aqueous azeotropic mixtures: process synthesis and optimization 69
Organic
Organic synthesis in subcritical water. Oxidation of alkyl aromatics 255
Oxidation
Kinetics and mechanism of methane oxidation in supercritical water. Oxidation of alkyl aromatics 141
Product distribution and reaction pathways for methylene chloride hydrolysis and oxidation under hydrothermal conditions 239
Organic synthesis in subcritical water. Oxidation of alkyl aromatics 255
Phase behavior
Prediction of phase behavior, Henry's constants and infinite dilution partial molar volumes for methane, ethane and hydrogen in n-paraffins 11
Phase equilibria
An empirical method to evaluate the enhancement factors of solids in supercritical gases 129
Phase equilibrium calculations
High-pressure multiphase behaviour of ternary systems carbon dioxide–water–polar solvent: review and modeling with the Peng–Robinson equation of state 185
Phthalates
Optimization of variables on the supercritical fluid extraction of phthalate plasticizers 271
Polyethylene carboxylation
Irradiation of low density and high density polyethylenes in presence of carbon dioxide in subcritical and supercritical conditions 177
Prediction
An empirical method to evaluate the enhancement factors of solids in supercritical gases 129
Pressure
Optimization of variables on the supercritical fluid extraction of phthalate plasticizers 271
Process parameters
Process parameters influencing ethanolysis of cod liver oil in supercritical carbon dioxide 85
PVC
Optimization of variables on the supercritical fluid extraction of phthalate plasticizers 271
P–x–y diagram
A new apparatus for the determination of P–x–y diagrams and Henry's constants in high pressure alcohols with critical carbon dioxide 223

Reaction pathways
Product distribution and reaction pathways for methylene chloride hydrolysis and oxidation under hydrothermal conditions 239
Separation
Near-critical separation of aqueous azeotropic mixtures: process synthesis and optimization 69
Solubility
Solubility behavior of solids and liquids in compressed gases 1
Solubility of stearic acid in supercritical CO_2-acetic acid and CO_2–*n*-octane mixtures at 308.15 K 123
An empirical method to evaluate the enhancement factors of solids in supercritical gases 129
Solvent
High-pressure multiphase behaviour of ternary systems carbon dioxide–water–polar solvent: review and modeling with the Peng–Robinson equation of state 185
Spiked bed
Extraction of β-carotene with supercritical fluids. Experiments and modelling 261
Stearic acid
Solubility of stearic acid in supercritical CO_2-acetic acid and CO_2–*n*-octane mixtures at 308.15 K 123
Styrene
Solubility behavior of solids and liquids in compressed gases 1
Subcritical
Organic synthesis in subcritical water. Oxidation of alkyl aromatics 255
Supercritical
Prediction of phase behavior, Henry's constants and infinite dilution partial molar volumes for methane, ethane and hydrogen in *n*-paraffins 11
Supercritical carbon dioxide
Process parameters influencing ethanolysis of cod liver oil in supercritical carbon dioxide 85
Irradiation of low density and high density polyethylenes in presence of carbon dioxide in subcritical and supercritical conditions 177
Supercritical CO_2
Solubility of stearic acid in supercritical CO_2-acetic acid and CO_2–*n*-octane mixtures at 308.15 K 123
Supercritical extraction
Extraction of β-carotene with supercritical fluids. Experiments and modelling 261
Supercritical fluid
Solubility behavior of solids and liquids in compressed gases 1
Breakthrough curves and adsorption isotherms of terpene mixtures in supercritical carbon dioxide 43
Supercritical fluid extraction
Supercritical carbon dioxide extraction of *Angelica archangelica* L. root oil 59
Optimization of variables on the supercritical fluid extraction of phthalate plasticizers 271
Supercritical fluids
Phase behavior of the reactants, products and catalysts involved in the allylic epoxidation of trans-2-Hexen-1-ol to (2R,3R)-(+)-3-Propyloxiranemethanol in high pressure carbon dioxide 109
An empirical method to evaluate the enhancement factors of solids in supercritical gases 129
Supercritical modeling
Phase behavior of the reactants, products and catalysts involved in the allylic epoxidation of trans-2-Hexen-1-ol to (2R,3R)-(+)-3-Propyloxiranemethanol in high pressure carbon dioxide 109
Supercritical oxidation
Isobutane oxidation in the liquid and supercritical phases: comparison of features 165
Supercritical water. Oxidation of alkyl aromatics
Kinetics and mechanism of methane oxidation in supercritical water. Oxidation of alkyl aromatics 141
Neutralization of acids and bases in subcritical and supercritical water: acetic acid and HCl 155
Product distribution and reaction pathways for methylene chloride hydrolysis and oxidation under hydrothermal conditions 239
Synthesis
Near-critical separation of aqueous azeotropic mixtures: process synthesis and optimization 69
Organic synthesis in subcritical water. Oxidation of alkyl aromatics 255
Temperature
Optimization of variables on the supercritical fluid extraction of phthalate plasticizers 271
Terpene mixtures
Breakthrough curves and adsorption isotherms of terpene mixtures in supercritical carbon dioxide 43
tert-Butanol
Isobutane oxidation in the liquid and supercritical phases: comparison of features 165
tert-Butyl hydroperoxide
Isobutane oxidation in the liquid and supercritical phases: comparison of features 165
α-tocopherol
High pressure phase equilibrium for binary system dl-α tocopherol + methanol 99
VLE
High pressure phase equilibrium for binary system dl-α tocopherol + methanol 99
Water
High-pressure multiphase behaviour of ternary systems carbon dioxide–water–polar solvent: review and modeling with the Peng–Robinson equation of state 185
Organic synthesis in subcritical water. Oxidation of alkyl aromatics 255
